also renegotiated, as were all major corporate supply agreements.”

(B) *“Increase in gross profit*

Pro forma gross margin is forecast to increase from 23.7% in FY2013 to 25.1% in FY2014 as a result of a wide range of pricing, supplier and range mix initiatives, as well as improvements to buying and stock management practices. Agreements with major suppliers have been renegotiated and new buying disciplines introduced to improve planning and increase accountability for stock levels and discounting. New pricing and promotion practices were developed in collaboration with suppliers, and improvements were made to in-store markdown procedures. Dick Smith’s range was revamped to focus on higher margin products and brands, and a new direct sourcing office was established in Hong Kong to enable more efficient purchasing, particularly for private label products and accessories. In addition, the roll out of new stores is forecast to contribute to an increase in gross profit in FY2014. Despite the forecast increase in gross margin in FY2014, the gross profit contribution of existing stores in dollar terms is expected to be lower than in FY2013 due to higher sales in FY2013 as a result of increased promotional and inventory clearance activity (see Section 5.4.2)”

- b. entered into or extended arrangements with suppliers and service providers based on decisions which focused on whether rebates would be obtained or maximised, rather than whether entering into or extending those contracts was in the best interests of Dick Smith Sub-Holdings or the DSE Group,

(the **Rebate-Maximisation Policy**).

72. Implementation of the Rebate-Maximisation Policy resulted in:

 - (iii) arrangements related to fixtures and fittings including fixtures and fittings that remained the property of vendors;

73. From Acquisition and at all material times, Dick Smith Sub-Holdings and/or Dick Smith Holdings accounted for O&A Rebates, including in the Prospectus Accounts, by recognizing O&A Rebates:
- a. immediately upon the O&A Rebate being negotiated with the supplier;
 - b. as an increase in "Other Receivables" in circumstances where the rebates were non-contractual in nature, and despite it being uncertain that the rebate would be earned and paid, such that it could be measured reliably;
 - c. as a reduction in 'Cost of Sales' on the basis that any excess over the marketing expense was related to goods sold, notwithstanding that the goods the subject of the rebate may not be identifiable;
 - d. as a reduction in 'Marketing costs' within "Cost of Doing Business", notwithstanding that each company did not incur marketing and sales promotions costs directly related to the goods the subject of the rebate in the period covered by that financial statement;
 - e. as an increase in "plant and equipment"; and/or
 - f. as an increase in inventories,
- (Rebate Accounting Approach).**

- a. reported:
 - (i) "Other Receivables" at higher levels, to the extent that the O&A rebates recognised in receivables were non-contractual, improbable or could not be reliably measured;
 - (ii) Plant and Equipment at higher levels, to the extent that O&A rebates recognised in plant and equipment did not qualify as items

of plant and equipment with probable future economic benefits that would flow to Dick Smith Holdings and/or Dick Smith Sub-Holdings and/or did not have a cost that could be measured reliably;
